

No one better understands and appreciates the organizational value of free-flowing information than institutions of Higher Education, and this is never more vital than when an adverse event occurs on campus. With Compatica, Health and Safety incidents are accurately documented and immediately communicated to key stakeholders, enabling a rapid institutional triage and an appropriate response. Be it an employee injury, a health screening, or a safety variance observation, Compatica will help record and report the incident posthaste.

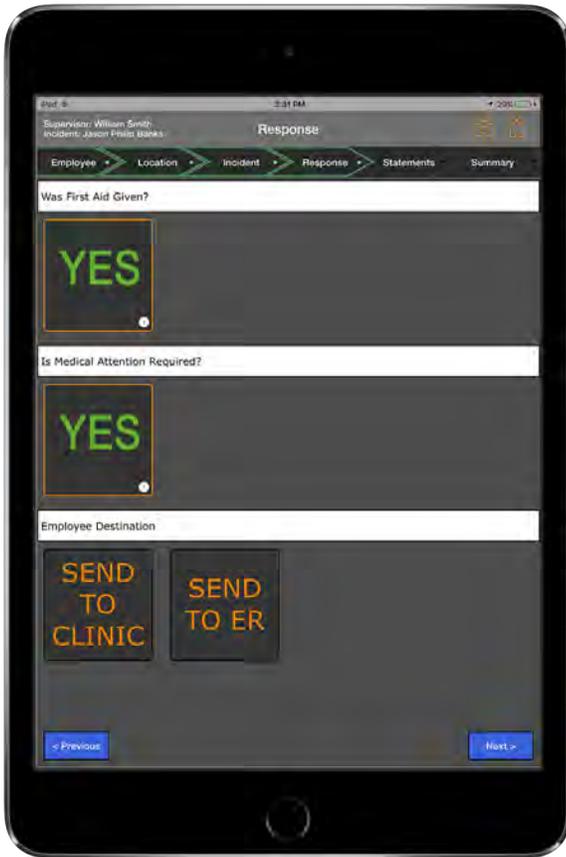

Compatica has been designed by industry experts to prevent the negative outcomes of delayed and inaccurate Workplace Incident reporting, namely upwards-spiraling claims costs, opportunities for fraud, avoidable legal actions, and needless delays in recognizing health issues. By implementing a point-of-occurrence incident recording app in supervisory employees' mobile devices, authorized users can report a variety of events in real time, including incidents such as:

- Injuries and Illnesses
- Vehicular, Property, Liability, and Environmental
- For Record Only
- Near Misses
- Safety Observations

Unifying the recording and reporting methodologies across the institution's various departments helps create a standard of practice which promotes an enterprise-wide culture of safety, observation, and reporting. Stakeholders such as Risk Managers, Directors of Safety, Department Directors and HR Managers can benefit from real-time incident notifications, adverse health screening results, electronic interaction, and standardized reporting and analytical capabilities.

At Compatica we contend that "delays equal dollars", and that collecting and transmitting information within the first four hours post-incident is critical to proper disposition and resolution. While not all incidents involve injuries, damages, or claims, successful, public-facing organizations establish mechanisms for transparent and timely reporting of all variances, as the single most significant measure to reduce incidents, protect workforce health, and limit exposure and risk.

## Onsite Incident Recording in the Palm of your Hand

Compatica places an intuitive, obvious-use app right in the Supervisor's smartphone and the Manager's tablet, facilitating on-the-spot, accurate, and comprehensive Workplace Incident reporting, encompassing Injuries, Illness, and Safety. Functionality includes:

- Immediate text and email notifications
- Complete event intake
- Pictures and audio recordings
- Safety Observations and Near-Misses
- Screen Employees and Report Health Issues
- E-Signed attestations & waivers
- Incident Locations, Zones, and Equipment
- Witness Statements
- Referrals to approved clinics (for injuries)
- Data required for FROI, OSHA, and all forms
- Supports iOS and Android devices
