Screening

Whether you need to record Injuries, document Damages, or track and respond to on-site Safety incidents, Compatica's unparalleled "all-in-one" app empowers all stakeholders to report any Worksite Incident in an intuitive, obvious-use manner, generating immediate notifications and automatically populating reports.

Point-of-Occurrence Incident Reporting

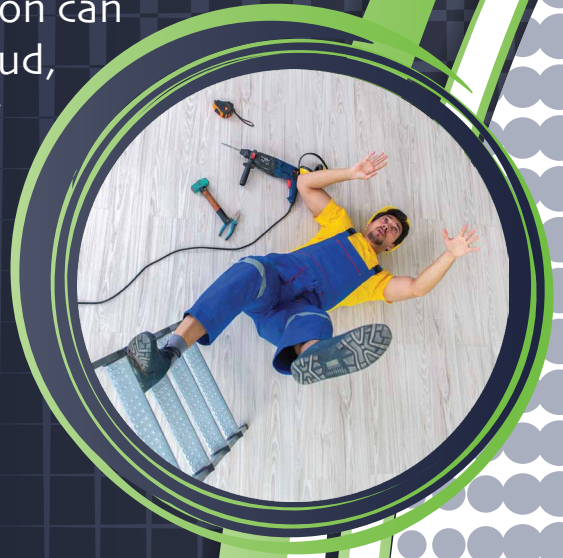

The single most significant step an organization can take to reduce claim costs, defend against fraud, and reinforce a safety culture is to record any and all worksite incidents in close proximity to their time and place of occurrence.

Compatica delivers a complete, holistic solution designed to support all types of worksite incidents, across all industries. A crisp, responsive user interface fits a broad variety of users and skill-sets, driving rapid implementation and adoption.

Equally at home in a wide range of job settings, Compatica supports a broad variety of worksite sectors, including Construction, Manufacturing, Distribution, Hospitality, Specialty Contracting, Higher Education, and Local Government. And while each industry is unique, the application's proprietary workflow and database structure accommodate the documentation of any type of workplace incident, in all sites and environments.
