

In a local government role, you are judged by how quickly and effectively you handle day-to-day interactions with the public and by the actions of employees. When exception events occur, relying on existing paper-based processes results in incident reporting that is slow, incomplete and often inaccurate, creating unnecessary financial and reputational risk.

Compatica empowers you to document all types of Workplace Exception Events, be it an injury to an employee operating equipment, a member of the public experiencing personal injury or property damage in a park, a fuel or other chemical spill, damage to a utility line, or any type of safety concern, including recording near-misses.

Using expert-designed workflows; robust tools that capture photos, witness statements, and sketches; and targeted, instant notifications, Compatica gets you the information you need, when you need it. Whether you manage Risk, HR or the entire Municipality, Compatica puts you in control; you're ready to fulfill your role and respond to incidents right away.
